DatamedFT™ Format Translator

A DatamedFT™ system consists of the DatamedFT™ v3 Base Software License plus one or more device Connection Licenses. A device Connection License is required for each acquisition EKG device that will send records to the translator software. Each order must specify the quantity and model number(s) of the devices. The DatamedFT™ v3 Base Software License is configured for a specific Host System and cannot be changed except by ordering a new Base Software License.

DatamedFT™ v3 Base Software License \$1,600 USD

This is required for all installations and includes the DatamedFT™ software. In addition to the software, Device Licenses must be purchased for each acquisition device as listed below.

DFT Cardiograph Connection License (each Cardiograph) \$800 USD

DFT Bedside Monitor Connection License (each Bedside Monitor)..... \$400 USD

DFT Defibrillator/Monitor Connection License (each Defibrillator/Monitor) \$400 USD

DFT System Input License (Combines with the Base License for a Host-to-Host License)..... \$8,400 USD

This license is intended for customers who have two different storage / management systems and want to set up a data feed from one to the other. It does not apply to acquisition devices.

DatamedRcv™ EKG Receiver Modules

DatamedRcv™ EKG Receiver Modules are optional add-on accessories for DatamedFT™ that provide protocol-specific reception for certain devices. Receiver Modules run as system services that monitor serial or (W)LAN ports for the desired protocol. These modules write out the EKG files for the DatamedFT™ service to convert. Depending on the desired service, additional hardware and/or setup may be necessary. A DatamedFT™ v3 Base Software License is required for these modules.

DRCV01 License (For GE® cardiographs and ZOLL® defibrillators) \$600 USD

This module will receive Serial/Modem/LAN/WLAN transmissions from most GE® cardiographs and certain ZOLL® defibrillators.

DRCV02 License (For Philips® PageWriter® Touch/Trim/TC cardiographs and PIIC iX) \$600 USD

This module will receive LAN/WLAN transmissions from Philips PageWriter® Touch, PageWriter® Trim II/III, PageWriter® TC-series cardiographs, and from PIIC iX.

DRCV05 License (For Dräger Infinity® monitors) \$600 USD

This module will receive LAN transmissions from Dräger Infinity® monitors.

DatamedSnd™ EKG Transmitter Modules

DatamedSnd™ EKG Transmitter Modules are optional add-on accessories for DatamedFT™ that provide protocol-specific transmission mechanisms for host systems that may not be able to load a file directly. Transmitter Modules run as system services that monitor a folder for converted files and send the files using the appropriate protocol. A DatamedFT™ v3 Base Software License is required for these modules.

DSND01 (For DICOM® storage/management systems) \$600 USD

DatamedWL™

A DatamedWL™ system consists of the DatamedWL™ v3 Base Software License plus one or more device Connection Licenses. A device Connection License is required for each acquisition EKG device that will query for orders from the software. Each order must specify the quantity and model number(s) of the devices. The DatamedWL™ v3 Base Software License is configured for a specific Host System and cannot be changed except by ordering a new Base Software License.

This is an optional add-on for DatamedFT™, and these costs are in addition to the license costs for DatamedFT™.

DatamedWL™ v3 Base Software License	\$800 USD
DWL Cardiograph Connection License	\$400 USD

Additional Server License for Test or Backup

This allows a test server and/or a redundant backup server to be running with an identical license configuration as the production server. The cost is calculated as a percentage of the software licenses that will be duplicated on the additional server. 15% of System Cost

Support / Maintenance Plans

A Support / Maintenance Plan (SMP) includes technical support by phone, email, or remote access, as well as minor version updates and patch releases for all covered software products. SMPs are required for all new installations or changes and are available for periods of one to five years. The cost is calculated as a percentage of the current total system software license cost.

1 Year – 10%	2 Years – 16%	3 Years – 22%	4 Years – 28%	5 Years – 34%
--------------	---------------	---------------	---------------	---------------

When renewing support after the initial term, if there is no gap in coverage then the percentages are discounted to: 8% for 1 Year, 14% for 2 Years, 20% for 3 years, 26% for 4 years, and 32% for 5 years.

SMP coverage is required to maintain the license. The right to use the software ends on the second anniversary of the SMP expiration date, and after that date the license can be restored by paying a Reactivation Fee of \$250 along with the SMP renewal.

Version 2 Software

All V2 versions of the above software products were designated by Datamed as end-of-life on April 30, 2020, which means that such software is no longer available for purchase and no longer eligible for support after that date. V2 licenses are generally eligible for a trade-in credit toward new V3 licenses. The trade-in value is determined by Datamed from time to time in its discretion. As part of the trade-in process a current total of connected devices must be provided, which will be the licensing for the new V3 version. As part of the trade-in the original hardware license key(s) must be returned.

Terms and Conditions

All sales are subject to the T&Cs published here: https://datamed.com/docs/datamed_terms_conditions.pdf.
